Re: Coffeen Power Plant – Update to Closure Plan for Ash Pond 1 and GMF Pond System

Illinois Power Generating Company (IPGC) is providing an update to the closure plans associated with the Coffeen Power Plant located near Coffeen, Illinois. See 40 C.F.R. § 257.102(b)(3)(i).

In April 2021 new Illinois state rules governing the management of CCR in Illinois became effective. In accordance with those new rules, we have submitted various documents to the Illinois EPA regarding the closure of Ash Pond 1 and GMF Pond System. On July 28, 2022, we submitted construction permit applications to Illinois EPA, which are required under the Illinois CCR program, along with new closure plans detailing the proposed closure approach for Ash Pond 1 and GMF Pond System.

Accordingly, we are updating our closure plans under 40 C.F.R. § 257.102 to incorporate the proposals submitted to Illinois EPA, which will involve removal of ash from the Secondary cell of the GMF Pond System and consolidation of ash for purposes of closure in place at Ash Pond 1 and the Primary cell of the GMF Pond System. IPRG's submission to Illinois EPA of the new proposed closure plan contains relevant information for purposes of the federal CCR program and reflects the manner in which the Ash Pond 1 and GMF Pond System will be closed if approved by Illinois EPA. The construction permit applications submitted to Illinois EPA, which includes the proposed new closure plans, will be posted to Luminant's public CCR website, along with this letter.

Sincerely,

A handwritten signature in blue ink that reads 'Dianna Tickner'.
