Re: Hennepin Power Plant – Update to Closure Plan for the East New Primary Pond

Dynegy Midwest Generation, LLC (DMG) is providing an update to the closure plan associated with the Hennepin Power Plant located near Hennepin, Illinois. See 40 C.F.R. § 257.102(b)(3)(i).

In April 2021 new Illinois state rules governing the management of CCR in Illinois became effective. In accordance with those new rules, we have submitted various documents to the Illinois EPA regarding the closure of the East New Primary Pond. On January 31, 2022, we submitted a construction permit application to Illinois EPA, which is required under the Illinois CCR program, along with a new closure plan detailing the proposed closure approach for the East New Primary Pond.

Accordingly, we are updating our closure plan under 40 C.F.R. § 257.102 to incorporate the proposals submitted to Illinois EPA, which will involve closure in place at the East New Primary Pond. IPRG's submission to Illinois EPA of the new proposed closure plan contains relevant information for purposes of the federal CCR program and reflects the manner in which the East New Primary Pond will be closed if approved by Illinois EPA. The construction permit applications submitted to Illinois EPA, which includes the proposed new closure plans, will be posted to Luminant's public CCR website, along with this letter.

Sincerely,

A handwritten signature in blue ink that reads "Dianna Tickner".
