Re: Kincaid Power Plant – Annual Progress Report to the Notice of Planned Participation to Achieve Permanent Cessation; NPDES Permit (IL0002241)

Dear Mr. LeCrone:

On January 20, 2021, Kincaid Generation, LLC (Kincaid Generation) submitted a notice of planned participation (NOPP) to the Illinois Environmental Protection Agency (IEPA), demonstrating that the Kincaid Power Plant's Units 1 and 2 qualify as electric generating units that will achieve permanent cessation of coal combustion no later than December 31, 2028. Pursuant to 40 C.F.R. § 423.19(g)(3), Kincaid Generation submits this annual progress report.

As stated in the NOPP, Kincaid Unit 1 and 2 boilers are scheduled to cease coal-fired operations by December 31, 2028. Kincaid Generation's pending Part A application under the federal CCR rule currently projects a retirement date of July 2027. Pursuant to 40 C.F.R. § 423.119(g)(4)(iii), Kincaid Generation is certifying that a retirement filing is not currently required in PJM that reflects the currently projected shutdown of the facility in 2027. However, based on the projected retirement date set forth in the pending Part A application, Kincaid Generation estimates that it would make a retirement filing with PJM no later than January 1, 2027 under current PJM rules.

As required by 40 C.F.R. § 423.19(g)(4), since the submission of the previous progress report on December 20, 2023, there have been no updates to milestones, and no completed, missed, or delayed milestones. A closure construction permit application, as required under 35 IAC Part 845, was prepared and submitted to IEPA on July 28, 2022. Upon IEPA permit approval and issuance, Kincaid Generation will proceed with the other action items detailed in the revised alternative closure demonstration.

If you have any questions regarding this submittal, please contact Mr. Phil Morris at 618-606-7788 or phil.morris@vistracorp.com.

Sincerely,
Kincaid Generation, LLC - Kincaid Power Plant
