RE: Coleto Creek Power Plant  
Annual Progress Report  
Federal ELG Notice of Planned Participation to Achieve Permanent Cessation

Dear Mr. Sadlier,

Pursuant to 40 C.F.R. § 423.19(g)(3), Coleto Creek Power, LLC (Coleto Creek) hereby submits this Annual Progress Report for the Notice of Planned Participation (NOPP) which was submitted to the Texas Commission on Environmental Quality (TCEQ) on October 1, 2021. The NOPP demonstrated that Unit 1 at Coleto Creek qualifies as an electric generating unit that will achieve permanent cessation of coal combustion by no later than December 31, 2028, and therefore may continue the discharge of bottom ash transport waters pursuant to 40 C.F.R. § 423.13(k)(2)(ii).

Pursuant to 40 C.F.R. § 423.19(g)(4)(iii), Coleto Creek is certifying that a suspension filing is not required by Electric Reliability Council of Texas (ERCOT) that reflects the planned conversion of the facility from coal to gas no later than 2027. However, Coleto Creek is expecting to update ERCOT's Resource Integration and Ongoing Operations in by mid-2027 with information indicating that the plant's fuel source is changing from coal to gas.<sup>1</sup>

As required by 40 C.F.R. § 423.19(g)(4), since the submission of the NOPP on October 1, 2021, there have been no updates to milestones, and no completed, missed, or delayed milestones.

If you have any questions regarding this submittal, please contact Dustin Manthei at 214-295-7334 or [dustin.manthei@luminant.com](mailto:dustin.manthei@luminant.com).

Sincerely,

A handwritten signature in blue ink, appearing to read "Renee Collins", is written over a light blue horizontal line.

Renee Collins  
Sr. Director Environmental
