Re: Coffeen Power Station; Gypsum Management Facility Gypsum Stack Pond, Gypsum Management Facility Recycle Pond and Ash Pond No. 1, Notice of Intent to Close CCR Surface Impoundments under 35 Ill Adm. Code 845.700.

Dear Mr. LeCrone:

In accordance with both 35 Ill Adm. Code 845.700(f) and 845.730(d), Illinois Power Generating Company (IPGC) is providing notice of intent to close the following CCR surface impoundments, under 35 Ill Adm. Code 845.700: Gypsum Management Facility (GMF) Gypsum Stack Pond, Gypsum Management Facility (GMF) Recycle Pond and Ash Pond No. 1 (AP1) at the Coffeen Power Station (Coffeen).

This notice of intent to close Coffeen's GMF Gypsum Stack Pond, GMF Recycle Pond, and AP1 were placed in the facility's operating record on May 11, 2021. IPGC will initiate closure of these CCR surface impoundments by taking steps necessary to implement each CCR surface impoundment's initial written closure plan, which were originally posted to the company's website in November 2016. IPGC ceased receipt of all waste streams in these three CCR surface impoundments by April 11, 2021. The initial written closure plan for each may be amended when detailed engineering has been completed. This notice of intent will be placed on our website at <https://www.luminant.com/illinois-ccr/> within the next 14 days.

Should you have any questions regarding this submittal, please feel free to address them to Brian Voelker at 217/412-6605 or brian.voelker@vistracorp.com

Sincerely,
Illinois Power Generating Company
