Re: Duck Creek Power Station; Gypsum Management Facility Pond and Bottom Ash Basin, Notice of Intent to Close CCR Surface Impoundments under 35 Ill Adm. Code 845.700.

Dear Mr. LeCrone:

In accordance with both 35 Ill Adm. Code 845.700(f) and 845.730(d), Illinois Power Resource Generating, LLC (IPRG) is providing notice of intent to close the following CCR surface impoundments, under 35 Ill Adm. Code 845.700: Gypsum Management Facility (GMF) Pond and Bottom Ash Basin (BAB) at the Duck Creek Power Station (Duck Creek).

This notice of intent to close Duck Creek's GMF Pond and BAB were placed in the facility's operating record on May 11, 2021. IPRG will initiate closure of these CCR surface impoundments by taking steps necessary to implement each CCR surface impoundment's initial written closure plan, which were originally posted to the company's website in November 2016. IPRG ceased receipt of all waste streams in these two CCR surface impoundments by April 11, 2021. The initial written closure plan for each may be amended when detailed engineering has been completed. This notice of intent will be placed on our website at <https://www.luminant.com/illinois-ccr/> within the next 14 days.

Should you have any questions regarding this submittal, please feel free to address them to Brian Voelker at 217/412-6605 or brian.voelker@vistracorp.com

Sincerely,
Illinois Power Resource Generating, LLC
